

Project 4 - Enterprise AI Document Intelligence & Resume Screening Platform

Requirement 2 , 3

The top screenshot shows the VS Code editor with the file explorer on the left displaying the project structure. The main editor shows the `utils/test_extractor.py` file with the following code:

```
1 from utils.extractor import DocumentExtractor
```

The terminal output shows the command `(venv) PS E:\project 4> python utils/test_extractor.py` and the resulting error: `ModuleNotFoundError: No module named 'utils'`. Below the error, the output of the `python test_extractor.py` command is shown, displaying the extracted content of several documents:

```
ai_policy.pdf
AI Policy
Company AI usage policy and governance.

company_rules.txt
Company Rules
1. Be respectful.
2. Maintain confidentiality.
3. Follow security policies.

employee_handbook.docx
Employee Handbook
Leave policy, code of conduct, benefits.

finance_report.pdf
Finance Report
Revenue, expenses, and profit summary.

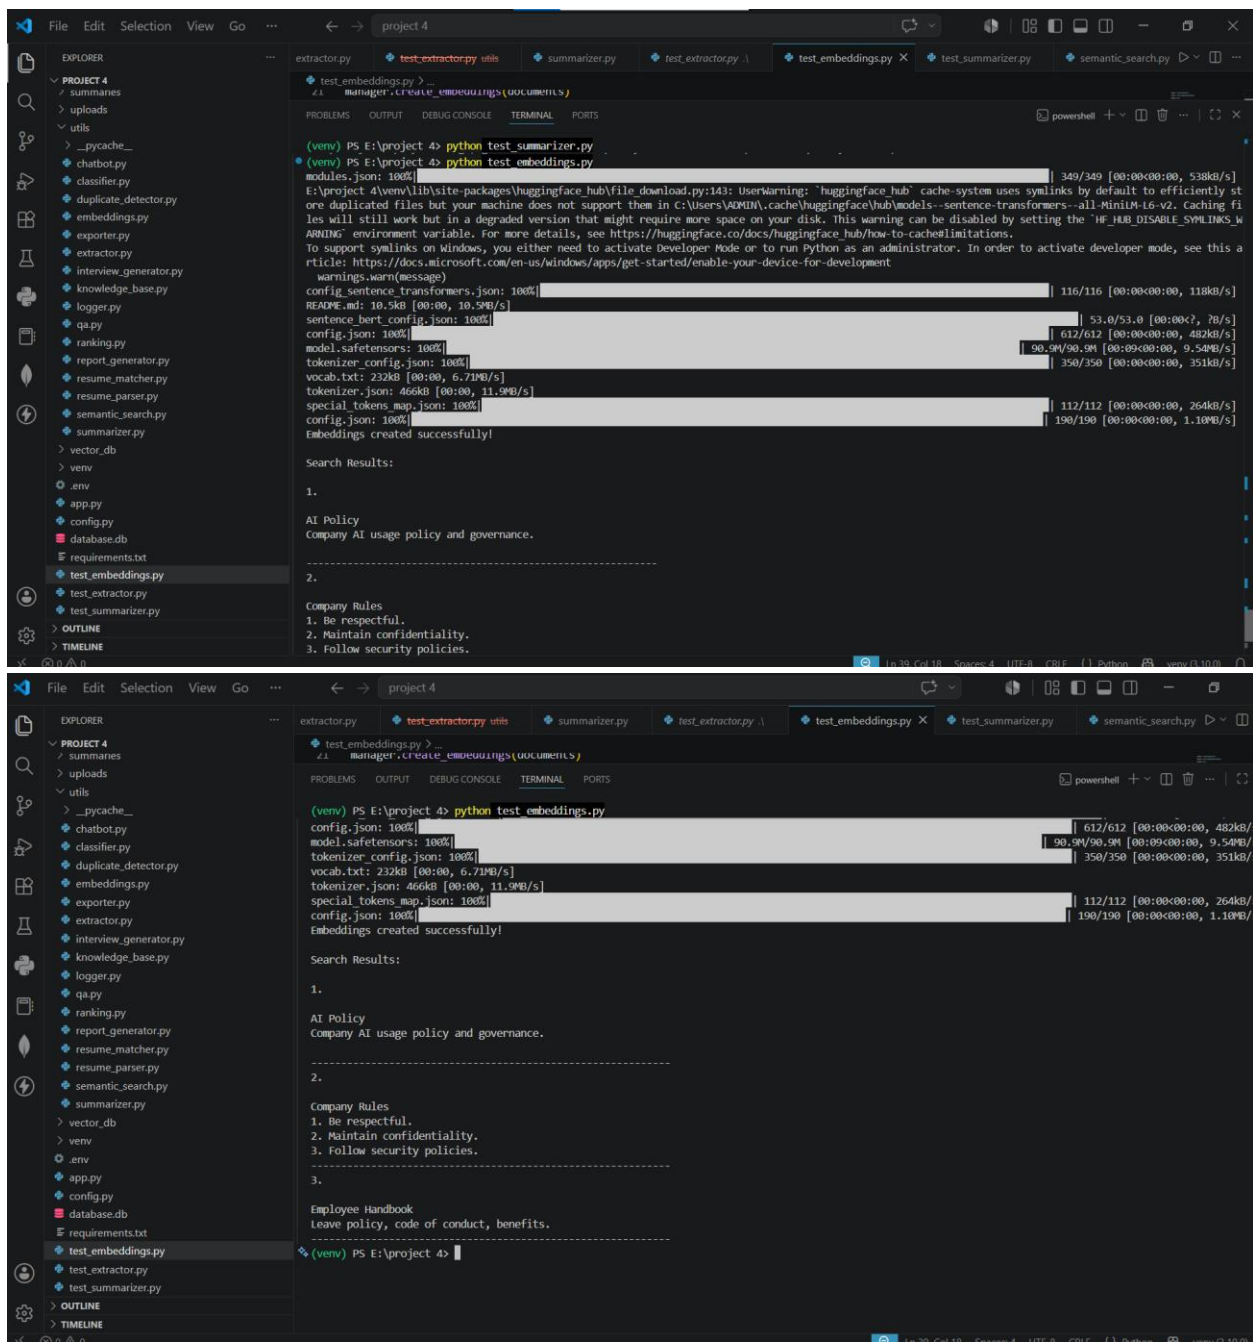

sales_report.pdf
Sales Report
Quarterly sales increased by 18%.
```

The bottom screenshot shows the same VS Code editor with the `utils/test_extractor.py` file. The terminal output shows the command `(venv) PS E:\project 4> python test_extractor.py` and the resulting output, which is the same as the one in the top screenshot, indicating that the error has been resolved.

Requirement 7, 8 & 9

Requirement 11

The screenshot shows the Visual Studio Code interface with the file explorer on the left displaying a project named 'PROJECT 4'. The file explorer lists various Python files, including 'test_interview_generator.py'. The main editor window shows the code for 'test_interview_generator.py', which includes a class 'InterviewQuestionGenerator' and a function 'generate_questions'. The terminal at the bottom shows the command 'python test_interview_generator.py' being executed, resulting in a list of 16 interview questions.

```
7
8 generator = InterviewQuestionGenerator()
9
10 questions = generator.generate_questions(resume)
11
12 print("-" * 80)
13 print("Interview Questions")
14 print("-" * 80)

12. Tell me about yourself.
13. Why do you want to join our company?
14. Describe a challenging situation and how you handled it.
15. Where do you see yourself in the next five years?
16. What are your strengths and weaknesses?

Requirement 12,14,18

The screenshot shows the Visual Studio Code interface with the file explorer on the left displaying a project named 'PROJECT 4'. The file explorer lists various Python files, including 'test_chatbot.py'. The main editor window shows the code for 'test_chatbot.py', which includes a while loop that prompts the user for a question and prints the response from the HR Bot. The terminal at the bottom shows the command 'python test_chatbot.py' being executed, resulting in a conversation between the HR Bot and the Employee.

```
9 while True:
10     question = input("\nEmployee : ")
11
```

PROBLEMS OUTPUT DEBUG CONSOLE TERMINAL PORTS

HR Bot :

Revenue, expenses, and profit summary

Employee : exit

(venv) PS E:\project 4>

Requirement 15, 19

The screenshot shows the VS Code interface with the `report_generator.py` file open. The file contains a `ReportGenerator` class with a `generate_report` method. The terminal shows the output of running `python test_report_generator.py`, which includes a `FileNotFoundError` for `reports/business_report.pdf` and a message indicating the report was generated successfully.

```
class ReportGenerator:
    def generate_report(self):
        # ... (code omitted) ...
        doc.build(story)
        return output_file

# ... (code omitted) ...
report_generator = ReportGenerator()
report_generator.generate_report()
```

```
(venv) PS E:\project 4> python test_report_generator.py
File "E:\project 4\venv\lib\site-packages\reportlab\platypus\doctemplate.py", line 1044, in _endBuild
  if getattr(self, '_doSave', 1): self.canv.save()
File "E:\project 4\venv\lib\site-packages\reportlab\pdfgen\canv.py", line 1302, in save
  self.doc.saverToFile(self.filename, self)
File "E:\project 4\venv\lib\site-packages\reportlab\pdfbase\pdfdoc.py", line 288, in SaverToFile
  f = open(filename, "wb")
FileNotFoundError: [Errno 2] No such file or directory: 'reports/business_report.pdf'

(venv) PS E:\project 4> python test_report_generator.py
Your max_length is set to 150, but your input_length is only 13. Since this is a summarization task, where outputs shorter than the input are typically wanted,
you might consider decreasing max_length manually, e.g. summarizer('...', max_length=6)
=====

Requirement 16, 17, 20

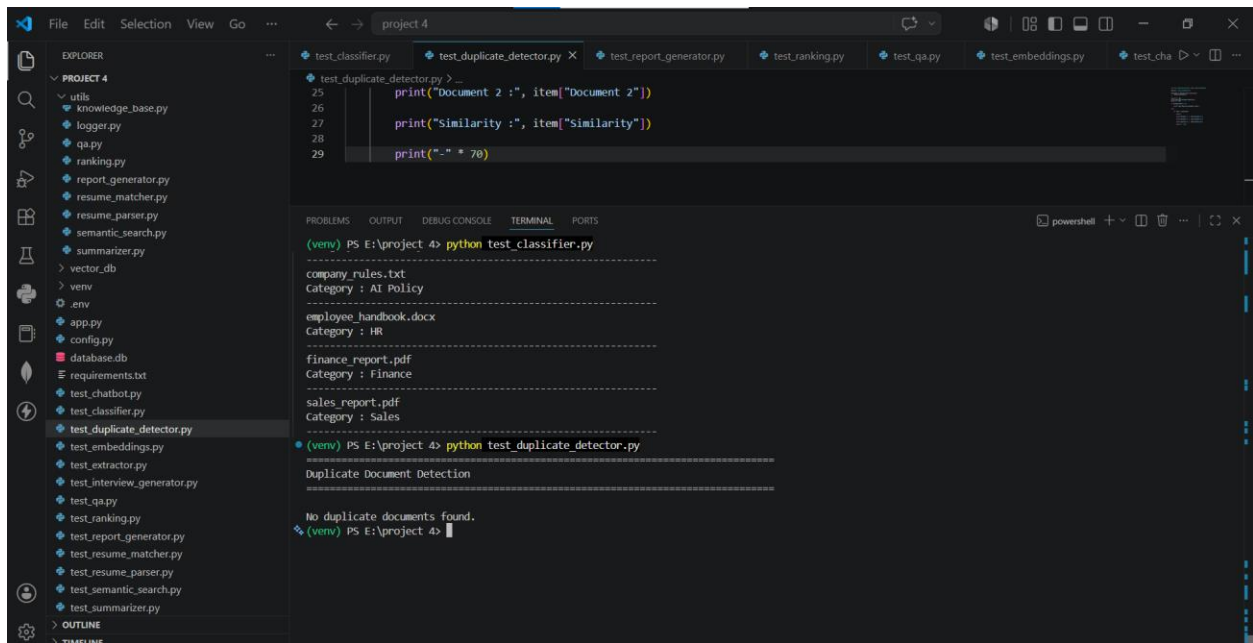

The screenshot shows the VS Code interface with the `test_classifier.py` file open. The file contains a `DocumentClassifier` class and a `test_classifier.py` script. The terminal shows the output of running `python test_classifier.py`, which displays the classification results for various documents.

```
class DocumentClassifier:
    def classify_folder(self, folder):
        # ... (code omitted) ...
        return results

# ... (code omitted) ...
classifier = DocumentClassifier()
results = classifier.classify_folder("datasets/documents")
print(results)
```

```
(venv) PS E:\project 4> python test_report_generator.py
you might consider decreasing max_length manually, e.g. summarizer('...', max_length=6)
